

## Thomson linear actuators improve vehicle accessibility for handicapped passengers

To help provide safe and easy van access for handicapped passengers, adaptive equipment provider, Fenton Mobility, used Thomson Electrak HD heavy duty, electromechanical linear actuators.

A recent *Controls, Drives & Automation* article details how Fenton's AbiliTrax, a universal flooring platform installed into a handful of American passenger vans, was aided by the Electrak HD's high load handling capability, environmental resistance and onboard electronics.

## Simplified motor integration with Thomson RediMount™ adapter kit

The popular and easy-to-use RediMount™ motor mounting adapter kit is now available as standard on all Thomson linear motion systems, making the whole process of choosing and mounting a motor much faster and easier.

Designed to accommodate more than 500 different motors and gearheads from a variety of manufacturers, the kit eliminates the need for custom-made, intermediate flanges between your choice of linear motion system and motor or gearhead.
