ELECTRAK® MARINE ACTUATORS

Features & Benefits

- Compact size
- Operates off 12 or 24 VDC boat battery for versatility
- Draws power only when load is being moved for high efficiency
- Holds load with power off for safety
- Stroke lengths from 2 to 24 inches
- Load ratings from 25 to 1500 lbs.
- Ball or acme screw drives for high or moderate load ratings
- Built-in brakes on ball bearing screw models to prevent back driving
- Weather protection seals & gaskets
- Ignition protected motors per Coast Guard requirements on selected designs
- Overload protection
- Lifetime lubrication gearbox - no maintenance

Thomson offers a complete line of Electrak linear actuators and controls to provide the boat and marine manufacturer with an ideal source for push-pull power on watercraft. Our Electrak linear actuators are well suited for the marine industry due to their compact size, 12 or 24 VDC operation, high efficiency and broad load capabilities.

The full range of Electrak actuators offer users complete control of every aspect of a boat’s operation electrically, without the complication, high cost, and maintenance associated with hydraulic systems. Electrak actuators are easy to install with clevis mounting and eliminate the need for hoses, pumps, filters, regulators, and periodic maintenance.
**Ideal for Power Boats and Sailcraft**: Electrak linear actuators find extensive use on power boats and sailcraft – all with the push of a button.

### Typical Applications:
- Raising, lowering, holding hatch covers
- Boom control when raising or lowering the mainsail
- Opening, closing, holding windows
- Downhaul control
- Raising and lowering trailer hitches
- Seat positioning
