Electrak® HD actuator helps paraplegic man regain passion for motorcycling

After almost a decade following an accident that left him wheelchair bound for life, Australian James Powell used his engineering background to build a custom solution that helped him get back on his motorcycle and rediscover a long lost passion.

A Design World article details how Powell used the Thomson Electrak HD electric linear actuator to help raise and lower stabilizing wheels during startup and stopping. The HD's ruggedness, IP69 rating, compact housing, onboard electronics and quick stroke was the only choice to get Powell back on his motorcycle and on the road with friends.

Don't miss Part 3 of the Smart Actuator Webinar Series

Spread across six parts throughout 2018, the Thomson Smart Actuator Webinar Series covers the gamut of the emerging industrial shift toward electromechanical linear actuators that can communicate with other interconnected components.

Part 3 will examine the markets and applications currently using smart actuators and detail why they make such a perfect fit.

This webinar is **scheduled for 21 August 2018**, and lasts only 30 minutes, so [register now](#) to get it on your calendar and continue to receive invitations to future parts.

Dive deeper into Thomson products with our dedicated websites

The next time you need information on Thomson linear motion components, check out our selection of dedicated product websites. These pages provide a more in-depth look into the features, benefits and applications of our actuators, bearings, screws and miniature components.

<p>Smart Actuation Website</p>  <p>As the industrial world becomes increasingly connected, the designer's need for intelligent components that can communicate with each other and operate without the need for manual intervention is growing...</p> <p>Learn More ></p>	<p>Electrak HD Actuators Website</p>  <p>Electrak HD. Superior Performance</p> <p>The Electrak HD is a new electric linear actuator platform with onboard electronics which can eliminate the need for standalone controls. Higher power opens a new, wider range of h...</p> <p>Learn More ></p>	<p>Linear Guidance Website</p>  <p>Round or Square Roll</p> <p>Yes, you can optimize performance, balance installed costs and extend machine life. All it takes is the right round or profile rail guide. And expert guidance from Thomson. We know...</p> <p>Learn More ></p>
<p>Miniature Systems & Components Website</p>  <p>Miniature Systems, Benefits</p> <p>Miniature linear motion components are ideal for applications where precise movement of small loads is critical. In particular, they provide added value in instruments for medical...</p> <p>Learn More ></p>	<p>Compact Design: Glidescrew Website</p>  <p>High performance, low complexity</p> <p>Put linear bearing, ball lead screw, the Glide Screw™ from Thomson combines the best features of these products into an easy to install, one-part solution. In addition, Thomson...</p> <p>Learn More ></p>	<p>Motorized Lead Screws Website</p>  <p>Reduce Motor Load Stress, One Product</p> <p>New motorized lead screws from Thomson combine a hybrid escape motor and a precision lead screw together in one compact envelope. They offer increased torque density, improved life...</p> <p>Learn More ></p>
<p>Pneumatic to Electric Conversion Website</p>  <p>Reduced Time, Energy and Cost</p> <p>Conversion from pneumatic cylinders to electric actuators makes machine operation easier, improve your machine's productivity, reliability, and performance by making the change to electric...</p> <p>Learn More ></p>	<p>Actuators: Mobile Off-Highway Website</p>  <p>View Capabilities, Select</p> <p>Electric linear actuators from Thomson outperform hydraulic and pneumatic systems in many important considerations which matter to OEMs and their customers. Lower cost of maintenance...</p> <p>Learn More ></p>
