

BALL SCREW REPAIR SERVICE

- **Factory Certified**
- **Comprehensive Repair & Replacement Service**

EASY & FAST

Thomson Ball Screw Repair & Service Options

The Complete Repair Service

Upon Receipt

We Will Perform an Extensive 40 Point Ball Screw Condition / Action Check

Standard Condition Check: 2 to 4 working days from receipt of ball screw

Emergency Condition Check: 1 working day from receipt of ball screw

Based on our findings we will then offer you the following options:

Repair Option

Strip, Clean, Rebuild With New Ball Bearings to Correct Condition

Any Ball Screw up to 3 meters overall length:

Standard Repair: 2 to 4 working days from receipt of order

Emergency Repair: 1 working day from receipt of order

Recondition Option

Repair & Regrind of Nut and/or Shaft Ball Groove Raceways

Any Ball Screw up to 3 meters overall length - Any Diameter from 8mm to 80mm

Standard Recondition: 5 to 8 working days from receipt of order

Emergency Recondition: 3 working days from receipt of order

Replacement Option

Reverse Engineer and Supply Drop-In Unit

Wherever possible replacements will be engineered from semi inventory

Standard Replacement: 10 to 12 working days from receipt of order

Emergency Replacement: 5 working days from receipt of order

Return

Return Ball Screw - Assembled, or as components

Wherever possible we will strive to satisfy our customer, by performing one of the Repair Options listed above. However If none of the above options are chosen, we will offer to return the ball screw(s) in either of the conditions shown below.

a) Re-assembled to original condition.

b) Or as separate components.

Please note: where totally new replacements are required, Thomson UK will quote the best price and delivery according to the complexity of requirements.
